Fascia Treatment with Patented Release Cutter Technology

4500 CZK 60 min

A single touch that can instantly rejuvenate. Treatment of fascia with the unique patented technology Release Cutter offers revitalization for both the face and the entire body. The Release Cutter method focuses on improving blood circulation, breaking down fat cells, and strengthening skin structure, resulting in tighter skin and overall skin improvement. The gloves stimulate the skin, giving it radiance and freshness, reducing puffiness, cellulite, and even improving the condition of scars. The gloves release fat cells that sink into deeper layers of the skin, avoiding surface irregularities. This method also effectively works with the lymphatic system. Thanks to the gloves, lymph is the only one capable of removing subcutaneous waste, toxins, and excess water. This treatment can be applied to the face, neck, décolleté, whole body, and chest, and its effects are supported by research.

FACIAL TREATMENTS BY MIMI LUZON

The treatment helps regenerate cells, improve skin elasticity, reduce wrinkles, promote collagen production, accelerate skin metabolism and has a positive impact on the treatment of skin infections and acne.

Mimi Luzon: Lift & Glow

6000 CZK 90 min

It delivers a high amount of oxygen deep into the skin, helping to rejuvenate skin tissue and ensure a radiant appearance. Gold sheets provide an immediate feeling of comfort, eliminate redness, and fine lines. Thermal skin treatment, which restores collagen fibers by heating the tissue. It helps renew cells in the basal layer, improving skin elasticity, reducing wrinkles, and increasing blood circulation. Intense hydration that softens, smoothens and enlarges the skin. Mimi Luzon: Get Even

FACIAL TREATMENTS

NAD+ Treatment

4500 CZK 90 min

This technology is based on high-pressure air needles, dense, strong ultrasound, and patented components from several serums. This innovative method effectively substitutes invasive procedures performed by a physician. Thanks to the high air pressure, it can penetrate the skin barrier and deliver serum to the deepest skin layers. The benefits of this non-invasive, painless treatment are visible after the first procedure. This process activates the regeneration of elastic and collagen fibers in the skin, down to the cellular level. One of the key components of this system is NAD+, a natural substance found in the body, but its levels decrease due to stress and the aging process. In contrast to oral supplementation of NAD+ containing dietary supplements, where only a minimal amount of this substance is used due to digestion, the advantage of this device is the possibility of local application with a high absorption rate, allowing precise targeting of weakened and damaged areas of the skin.

L.ma Face Mask Cure Treatment

3500 CZK 45 min

This invisible light non-invasively activates skin cells, providing healthy and radiant skin. L.ma is a cosmetic technology that utilizes „CURE Light“ with a wavelength of 940 nm, naturally restoring skin elasticity and tone. The unique technology helps improve skin imperfections and slows down aging. This light is safe, produces no heat, and has no contraindications. Phototherapy with a wavelength of 940 nm relieves muscle tension, improves skin circulation, and activates cells at the cellular level. This activation increases the amount of cellular fuel (ATP), promoting cell regeneration, skin elasticity, and anti-aging. L.ma is an effective and non-invasive method that brings radiant skin and affects many aspects of the skin.
